Double-sided Sealing Tape 30 meter

- **Perfect for sealing different materials.**
- **Flexible and water resistant.**

**For
waterproof
joints.**

The black sealing tape is double-sided and made of polyisobutylene. Used to seal joints between two different materials, such as the cabinet bottom and a plastic floor protector.

The tape has excellent adhesion and is both flexible and water resistant. It can be used both indoors and outdoors. It attaches to clean and dust-free plastics, ceramics, glass, wood and metal etc. The water resistance has been tested and approved by RISE.
