

Tollco Sealing range

Sealant 40 gram

- **Formable and flexible.**
- **For indoor or outdoor use.**

Seals
pipe
penetra-
tions.

The sealant is made of formable polyisobutylene and seals around pipe penetrations, such as water pipes and drain pipes. Can also be used to seal cracks, gaps and small holes. It joins different materials such as plastic, laminates, ceramics, glass, wood and metal.

The sealant has very good adhesion and does not dry out. It is also paintable, flexible and water-resistant, and can be used both indoors and outdoors. To waterproof kitchen sink cabinets, use Tollco Sealant together with our sleeve couplings to protect seals, base cabinet inserts and our bushings for dishwasher hoses. This way, you create an easy-to-clean, water-resistant sink cabinet.

RISE has tested and approved waterproof properties of Tollco Sealant in combination with Tollco Base Cabinet Insert.
