

# Tollco Whitegoods underlay Dishwasher Pro

- **Detect water leakage in time.**
- **Prevents water damage under dishwashers and washing machines.**

**Prevents  
water damage.  
Collects and  
diverts.**

Pro-series mats are placed under dishwashers and washing machines to prevent water damage. The mat is designed to quickly collect water from hidden areas and divert it out from the centre in front of the machine.

The mat is customised for Tollco Wet Zone, which means you can use Tollco Edge Clamp (item no. 3801001-08-001) to join floor protectors and divert water leakage through the edge of two adjacent floor protectors.

By combining these products, you have created a wet zone under your kitchen equipment. A simple safe installation that can reduce the risk of water damage in the kitchen.

The mat is semi-transparent and made of impact-resistant polypropylene plastic and is available in two different standard sizes. The assembly instructions are easy to follow and are of course approved by Säker Vatten. The product is also accepted in Byggarubedömningen and assessed by Sundahus.

### Meets the requirements

Tollco mats for the Standard and Pro series meet the requirements in Chapter 8, Section 4-3 of the Swedish Planning and Building Act in the respects and under the conditions specified in Type Approval 0505/01 and are therefore approved in accordance with the provisions in the following sections of the Swedish National Board of Housing, Building and Planning's construction rules: BBR: Hidden areas in rooms or building components 6:5334.
