

Tollco Whitegoods underlay Dishwasher Standard

- **Detect water leakage in time.**
- **Prevents water damage under dishwashers and washing machines.**

**Prevents
water damage.
Collects and
diverts.**

The mat is placed under dishwashers to prevent water damage. It is designed to quickly collect water from hidden areas and divert it out from the centre in front of the machine so that the leak can be detected.

The mat is customised for Tollco Wet Zone, which means you can use Tollco Edge Clamp (item no. 3801001-08-001) to join floor protectors and divert water leakage through the edge of two adjacent floor protectors.

By combining these products, you have created a wet zone under your kitchen equipment. A simple safe installation that can reduce the risk of water damage in the kitchen.

Available in two different standard sizes. The assembly instructions are easy to follow and are of course approved by Säker Vatten.

The mat is transparent and made of impact-resistant polypropylene plastic. The product is also accepted in Byggarbetsnämningens.

Meets the requirements

Tollco mats for the Standard and Pro series meet the requirements in Chapter 8, Section 4-3 of the Swedish Planning and Building Act in the respects and under the conditions specified in Type Approval 0505/01 and are therefore approved in accordance with the provisions in the following sections of the Swedish National Board of Housing, Building and Planning's construction rules: BBR: Hidden areas in rooms or building components 6:5334.
