

Tollco Whitegoods underlay Water-connected appliances

- **Detect water leakage in time.**
- **Prevents water damage under coffee machines and water dispensers.**

**Prevents
water damage.
Collects water
leakage.**

Tollco Whitegoods underlay for Water-Connected Appliances is placed under coffee machines or water dispensers to prevent water damage.

The machine mat has folded edges and effectively collects water leakage from hidden areas.

When the water leakage has been collected on the bottom of the machine mat, Tollco Leakage Circuit Breaker is activated (if it is installed), which emits a signal and shuts off the water. This provides complete protection against devastating water damage that can occur when the office coffee machine or water dispenser begins to leak.

The mat is black and made of environmentally-friendly impact-resistant polypropylene plastic. Available in different standard widths and depths. The assembly instructions are easy to follow and are of course approved by Säker Vatten.

From Säker Vatten: "A water-connected appliance without a connection to a floor drain, such as a coffee machine or a water dispenser, should be placed on a waterproof surface with folded edges around it. The appliance must be fitted with a shut-off valve with an easily accessible control device. The appliance should also have a moisture sensor on its waterproof surface. The moisture sensor should be connected to a leakage circuit breaker or water circuit breaker."

Appliance mats customised for free-standing, water-connected machines, such as coffee machines and water dispensers. They are designed to collect condensation and water leakage from hidden areas both in front of and under the machine so that a water alarm or leakage circuit breaker can detect and prevent ongoing water leakage. This way, you avoid unnecessary water damage.

Meets the requirements

Tollco mats for the Standard and Pro series meet the requirements in Chapter 8, Section 4-3 of the Swedish Planning and Building Act in the respects and under the conditions specified in Type Approval 0505/01 and are therefore approved in accordance with the provisions in the following sections of the Swedish National Board of Housing, Building and Planning's construction rules: BBR: Hidden areas in rooms or building components 6:5334.
