

Assembly Instruction Wet Zone Kitchen

System description

Tollco WaterFuse PlugIn

Protects against water damage. Shuts off the water and sounds a beeping alarm in the event of a leak.

Tollco Edge Clamp and Tollco Floor

The edge clamp joins floor protectors in the wet zone and diverts water leakage through the edge of two adjacent floor protectors. The water from the leak is then transported down to the nearest floor drain/Tollco floor protection or from the floor protection on out to the floor.

Tollco Wall Panel

The wall panel diverts water to the floor protection.

Tollco Flood Protection Mini-Drain

The flood protection is a wastewater pipe mounted in the bottom of the cabinet. It creates a natural slope and diverts the leak to the floor protection, which is a waterproof area.

Tollco Flood Protection with non-return valve

The flood protection is mounted in a 75 mm drain pipe along with floor protection. It has a seal that provides a waterproof installation and is equipped with a non-return valve to prevent odours from drains.

SCAN CODE FOR MORE INFO ABOUT THE PRODUCT.

Tollco Wet Zone is a comprehensive solution that is inexpensive and easy to install. The products are made of impact-resistant polypropylene plastic, tested and approved in accordance with type approval 0505/01 and accepted in Byggvarubedömningen.
