

Tollco Water fault switch

WaterFuse House

Complete
system for
waterproof
security.

- **Creates security whether you are at home or travelling.**
- **Detects the slightest water leak, shuts off the main water line and emits an alarm.**
- **Minimise the risk of water damage.**

THREE MAIN FEATURES:

- You can simply turn off the water when you leave home.
- Automatic leak checks in the water system when the water is turned off.
- Detects, shuts off and warns in the event of leakage under dishwashers and washing machines, amongst other things.

IT WORKS VERY SMOOTHLY

Press OFF on the remote and turn off the water when you leave home. If the dishwasher is running, you can select delayed shutdown. When you get home, turn on the water by pressing the ON button on the remote.

Leak checks are performed every time the water is turned off as well as once more per day. This means that even hidden leaks in walls and connections are detected. If the system detects a leak, you will receive a warning and can take appropriate action. Detectors are located under the dishwasher and washing machine and other sensitive places. If there is the slightest leak, a signal is sent to the central unit and the main water line is turned off.

Temperature sensors in the detectors turn off the water if there is a risk of freezing damage.

SECURE BENEFITS

The water fault switch performs a daily quality check of the property's pipe system. This gives you an advantage when selling the home, as the risk of hidden faults is reduced. The greatest security is that it shuts off in the event of a leak. You will also find dripping faucets or running toilets, which will reduce water costs and prevent discoloration of toilet seats and sinks.

RECOMMENDED BY INSURANCE COMPANIES

Water damage entails high costs for insurance companies. Therefore, many support the installation of our water switches/water circuit breakers. Check with your insurance company about what requirements they have and how you can get a lower premium or installation contribution.
