

Tollco Floortray kitchen Wallboard

Prevents water damage. Collects and diverts downwards.

- **Detect water leakage in time.**
- **Prevents water damage to the wall behind appliances, sink cabinets.**

The wall panel is a sealing layer against walls that is customised to divert water leakage down to our leak protection such as Tollco Appliance Mat Pro and Standard, Tollco Wet Zone Floor Protection Dishwasher/Washing Machine, Floor Protection Base Cabinet or Tollco Base Cabinet Insert.

It is a common occurrence for there to be water leakage from the dishwasher's hoses or connections. This water leakage is difficult both to detect and collect, as it often starts with a small jet of water spraying onto the kitchen wall behind the machine. It is very important for leaking water to not come in contact with moisture-sensitive building materials such as the kitchen walls.

Prevent water damage by installing the wall panel and diverting the leak down to, for example, Tollco Floor Protection, where the water can be collected and either diverted and made visible or the water supply can be shut off by installing a leakage circuit breaker.

Mount with double-sided adhesive tape directly on the kitchen wall in back, sink cabinet (can replace the cabinet's rear wall panel) or water-connected equipment such as a dishwasher.

The wall panel is placed in;

- Tollco Floor Protection Base Cabinet
- Tollco Floor Protection Dishwasher/Washing Machine
- Tollco Appliance Mat
- Tollco Base Cabinet Insert

Then place the base cabinet or appliance on the mat

Meets the requirements

Tollco mats for the Standard and Pro series meet the requirements in Chapter 8, Section 4-3 of the Swedish Planning and Building Act in the respects and under the conditions specified in Type Approval 0505/01 and are therefore approved in accordance with the provisions in the following sections of the Swedish National Board of Housing, Building and Planning's construction rules: BBR: Hidden areas in rooms or building components 6:5334.
